

std::exception

```
classDiagram
    class std_exception["std::exception"]
    class original_callback_signature_error["original::CallbackSignatureError"]
    original_callback_signature_error --|> std_exception
```

The diagram illustrates an inheritance relationship. At the top is a white box representing the `std::exception` class, divided into three horizontal sections. The bottom section is empty. Below it is a blue arrow pointing upwards, indicating inheritance. At the bottom is a grey box representing the `original::CallbackSignatureError` class, divided into three horizontal sections. The top section contains the class name, the middle section is empty, and the bottom section contains a public method `+ what()`.

original::CallbackSignature
Error

+

what()
