

std::exception

```
classDiagram
    original::outOfBoundError --|> std::exception
```

The diagram illustrates an inheritance relationship. At the top is a white box representing the 'std::exception' class, divided into three horizontal sections. The top section contains the text 'std::exception', while the two bottom sections are empty. Below this box is a blue arrow pointing upwards, ending in a hollow blue triangle. At the bottom of the diagram is a gray box representing the 'original::outOfBoundError' class, also divided into three horizontal sections. The top section contains the text 'original::outOfBoundError', while the two bottom sections are empty. The upward-pointing arrow indicates that 'original::outOfBoundError' inherits from 'std::exception'.

original::outOfBoundError
